

## Education .....

**M.Sc., Computer Science** | Some University

*December 2008*

Thesis: "Formatting a CV in LaTeX"

GPA: 3.910

**B.Sc., Computer Science (Honors)** | Some University

*May 2006*

Minor: Software Engineering

GPA: 3.882

## Skills .....

- Primary languages: C, C++
- Embedded systems programming
- Additional languages: Java, COBOL, Perl
- Linux system administration

## Experience .....

**Project Manager**

*June 2010 – Present*

Some Company | Some Place, MO

- Did stuff with software.
- Led a team of other people who did stuff with software.
- Made computers do magic.

Some University | Somewhere, TX

- Pretended I knew what I was doing when people asked me questions.
- Wrote a bunch of code that didn't compile.

## Research projects .....

### Internet of Everything

- **IoT Security Suite:** Implemented network protocols devoid of cryptography to allow IoT devices to easily share data with hackers.
- **Software Stack for Embedded Devices:** Designed a suite capable of connecting various appliances to the Internet, provided you can fit an x86 processor inside them.
- **Embedded Device Reliability:** Invented a mechanism to prevent IoT devices from failing more than once every few hours.

### Mission-Critical Software Systems

- **Scalability:** Created a monolithic backend system capable of supporting no more than 10 users concurrently.
- **Resilience:** Architected a database system which only loses half of its data when it fails.
